SKILLS

- Microsoft Azure & DevOps
- .Net, C#, ASP.NET MVC
- React, Next.js, TypeScript
- HTML, CSS, Tailwind CSS
- Serverless Computing, Docker
- API-Entwicklung, Pisma, SQL
- Agile Softwareentwicklung
- GIT, CI/CD Pipelines

LANGUAGES

- Deutsch (Fluent)
- Englisch (Fluent)
- Persisch (Native speaker)

CERTIFICATES

- AZ-400 (Designing and Implementing Microsoft DevOps Solutions)
- AZ-204 (Azure Developer Associate)
- AZ-900 (Azure Fundamental)
- Scrimba (The Frontend Developer Career Path)

PROFILE

Experienced Full-Stack Developer with deep expertise in modern web technologies (React, Next.js, TypeScript, .NET) and solid skills in Microsoft Azure & DevOps. Specialized in building scalable applications and automating CI/CD pipelines. Certified in AZ-204 (Developing Solutions for Microsoft Azure) and AZ-400 (Designing and Implementing Microsoft DevOps Solutions). Passionate about clean code, agile methodologies (Scrum, Kanban), and combining frontend excellence with robust cloud architecture.

PROFESSIONAL EXPERIENCE

Freelance - Contract 2022 - Gegenwart
Senior Azure & Full-Stack Developer

- Developed modern full-stack applications with React, Next.js, TypeScript, and .NET
- Built scalable Azure solutions (Functions, App Services, Containers) and automated deployments with Azure DevOps
- Implemented CI/CD pipelines & Infrastructure as Code (Terraform) to ensure efficient and resilient deployments

Acando - CGI 2018 - 2022
Lead Consultant

- Consulting on full-stack and web development projects with a focus on Microsoft Dynamics 365, C#, and .NET
- Configuration and customization of Dynamics 365 across various client projects

TU Clausthal & IAV 2016 - 2018
Research Assistant & Master's Candidate

- Development of an e-commerce website and an Android app user interface
- Creation of a traffic simulation and a voice-dialog-based system for vehicle testing

Pars Parva System 2010 - 2014
Web Developer

- Cloud hosting (including CRM), API integration, as well as administration and troubleshooting in Linux and Windows servers

AUSBILDUNG

Master's in Computer Science 2015-2018
Technische Universität Clausthal

PROJECTS

Energy Provider (DAX Corporation, Germany) 2022 - Present
Senior Azure & Full-Stack Developer

Migration and further development of the web platform into the Azure Cloud. Use of Infrastructure as Code (Terraform) and Azure Pipelines for automated deployments. Optimization of the cloud infrastructure, continuous application updates, and implementation of best practices for performance, security, and reliability.

Regional Network Operator (Energy Sector, Germany) 2019 - 2022
Full-Stack Developer

- Development of a web platform for ordering photovoltaic systems (PV) and house connections using C# and ASP.NET MVC. Responsible for frontend and backend development, implementation in an agile environment, setup of initial Azure services, and introduction of CI/CD pipelines in Azure DevOps. Focus on scalable code and on-time delivery.

German Infrastructure Project (Aviation) 2020
Lead Consultant

- Configuration and customization of Microsoft Dynamics 365 for core business processes. Responsible for tailoring the platform to customer requirements as well as integration into existing systems. Focus on efficiency improvements, data quality, and the implementation of stable, maintainable solutions in a regulated environment.

Personal Projects & Learning Projects (Selection) 2022 - Gegenwart
Senior Full-Stack Developer

- Personal Website - Built with React, Next.js, GraphQL, Tailwind CSS, and Strapi as the backend. Self-hosted on Ubuntu with PostgreSQL for Strapi database. Includes blog, project overview, and portfolio.
- Link Sharing App - Fully functional full-stack application using Next.js, React, TypeScript, Prisma, and PostgreSQL. Features: secure authentication, management of social media links (incl. drag & drop), profile picture upload to Azure Blob Storage, real-time preview, and fully responsive design.
- Invoice App - Invoice management system built with Next.js, React, TypeScript, Tailwind CSS, and Prisma. Features: create, edit, delete, and filter invoices; light/dark mode; pagination; real-time updates; and database integration with PostgreSQL on Ubuntu server.

More projects with source code are available on my website:
